

COLA SOLVENT CEMENT for pipes

DESCRIPTION:

Easy application adhesive which provides strong junctions and resistance against aggressive products and ageing. It is a welder adhesive to join PVC and ABS pipes and accessories.

INSTRUCTIONS:

Clean and degrease the areas to be glued. Apply a smooth layer of adhesive on the connection and another one at the end of the chamfered pipe. Proceed to join without turning and keep pressing for a while. Such operation must be done quickly once the adhesive is applied. The adhesive final setting is approximately after 4 hours of its application.

PRESENTATION:

*500 g container with screw cap and brush.
Estimated performance of unions = 700*
