

TF.05 FLEXIBLE PIPE 0,5 m.

MODELS:

TF.05 Red
TF.05 B White

SIZE:

Fitted with an Steel spiral inside which allows several radius bendings without collapsing with internal diameter of 22 mm.

Sleeves glued at their ends for 25 mm pipes.
Total length: 0,5 m (*special sizes on request*).

Utilities:

Ideal for saving formwork beams in ceilings, allowing not having to make too many bendings in the pipe line in order to prevent performance losses in the Detector.

MATERIAL:

Translucent-red flexible PVC Elastomere

Maximum temperature of use: - 0° to 60°.
In lower temperatures it crystalizes causing its breakage.
We have other Pipes suitable for Cold-storage rooms up to - 30°.
